Walkthrough: Customer Analytics Donut Chart & Live Delivery Location Map

We have successfully integrated two major analytics intelligence modules into the **INEZA RESTO & COFFEE SHOP** Management Portal:

1. **Registered vs. Guest Customers Segmentation Donut Chart**
2. **Interactive Kigali Customer Delivery Location Map** (powered by Leaflet.js)

1. Registered vs. Guest Customers Donut Chart

Located in **Tab 7: Sales & Financial Analytics** in :

- **Data Identification**: Automatically correlates order records with the customer loyalty directory () by telephone number, email address, customer name, and customer ID.
- **Visual Circular Donut**: High-clarity SVG donut chart with a center percentage counter displaying the ratio of Registered VIP Customers vs. Guest Checkouts.
- **Financial Metric Breakdown**:
    - **Registered Customers**: Total orders, percentage share, total revenue contributed in RWF, and loyalty tag.
    - **Guest Checkouts**: First-time / walk-in orders, percentage share, and revenue in RWF.
    - **AOV Benchmark**: Direct comparison of Average Order Value (AOV) between registered members and guest visitors.

2. Interactive Kigali Customer Delivery Location Map

Built using **Leaflet.js** and integrated directly above the Top Dishes leaderboard in :

- **Headquarters Anchor**: Anchors **INEZA RESTO & COFFEE SHOP** at Kimironko HQ (`-1.9365, 30.1302`) with an emerald green coffee cup badge.
- **Live Delivery Pins**: Dynamically plots delivery orders using custom motorcycle icons:
    - **Blue Pins**: Completed / Delivered / Closed orders.
    - **Amber Pins**: Active / On the Way / Preparing orders.

- **Interactive Order Popups**: Clicking any pin displays a modal tooltip showing:
  - Order Code (e.g. `#FC-2690`)
  - Customer Name & Phone Number
  - Delivery Landmark / Street Address
  - Total in RWF & Order Stage
- **Kigali Neighborhood Geocoding**: Automatically parses street addresses and categorizes them across Kigali sectors:
  - *Kimironko, Remera, Kacyiru, Nyarutarama, Kiyovu, Gisozi, Kicukiro, Kanombe, Kibagabaga, Kagugu, Nyamirambo, Gikondo*.
- **Top Delivery Neighborhoods Leaderboard**: Shows live count badges summarizing customer order density per neighborhood.
- **1-Click Recenter (HQ)**: Quickly restores default focus to the Kimironko flagship store.

3. Synchronized with Analytics Date Filters

Both the **Donut Chart** and the **Delivery Location Map** automatically re-render and recalculate whenever you switch the analytics time range toolbar:

- **All Time**
- **Today**
- **Last 7 Days**
- **This Month**

4. Verification & Git Commit

- **Git Commit**: `3bfa0a7`
- **Branch**: `main` (pushed to `origin/main`)
- **Key Files Modified**:
  -
  -
